ATTACHMENT TO BURSA SECURITIES QUARTERLY REPORT FOR 1^{ST} QUARTER ENDED 31 MARCH 2009

GENTING BERHAD

NOTES TO THE INTERIM FINANCIAL REPORT – 1ST QUARTER ENDED 31 MARCH 2009

(I) Compliance with Financial Reporting Standard ("FRS") 134: Interim Financial Reporting

(a) Accounting Policies and Methods of Computation

The interim financial report is unaudited and has been prepared in accordance with Financial Reporting Standard ("FRS") 134: "Interim Financial Reporting" and paragraph 9.22 of Bursa Malaysia Securities Berhad ("Bursa Securities") Listing Requirements. The financial information for the current quarter ended 31 March 2009 have been reviewed by the Company's auditor in accordance with the International Standards on Review Engagements ("ISRE") 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity.

The interim financial report should be read in conjunction with the audited financial statements of the Group for the financial year ended 31 December 2008. The accounting policies and methods of computation adopted for the interim financial statements are consistent with those adopted for the annual audited financial statements for the financial year ended 31 December 2008.

(b) Seasonal or Cyclical Factors

On an overall basis, the business operations of the Group's Leisure & Hospitality Division and Plantation Division are subject to seasonal fluctuations. The results of the Leisure & Hospitality Division are affected by major festive seasons and holidays. Fresh fruit bunches ("FFB") production is seasonal in nature. Production of FFB normally peaks in the second half of the year but this cropping pattern can be affected by changes in weather conditions. More detailed commentary is set out in Notes 1 and 2 in Part II of this interim financial report.

(c) Unusual items Affecting Assets, Liabilities, Equity, Net Income or Cash Flow

Pursuant to paragraph 61 of FRS 139, a significant or prolonged decline in the fair value of an investment in an equity instrument below its cost is objective evidence of impairment. Consequently, in compliance with the requirements of FRS 139, the fair value loss of RM30.4 million in the investment in Star Cruises Limited ("SCL") is recognised as an impairment loss in the income statement. This fair value loss of RM30.4 million represents the decline in SCL's share price to USD0.08 per share as at 31 March 2009 from the Group's carrying value of USD0.085 per share as at 31 December 2008.

(m) Intangible Assets

The Group recognises costs incurred on development projects as intangible assets to the extent that the capitalisation criteria in FRS 138: "Intangible Assets" are met. The Group uses its judgment in determining whether the milestones payments for research and development expertise and capacity in genomics meet the capitalisation criteria so as to enable the amount to be capitalised. The future commercial viability of these intangible assets is assessed by using discounted cash flow valuation technique and the recoverability of these intangibles is periodically reviewed by the management.

Quarter ended 31 March 2009 compared with quarter ended 31 March 2008

The Group registered a revenue of RM2,069.2 million in the current quarter compared with RM2,164.3 million in the previous year's corresponding quarter, a decrease of 4%. Lower revenue was recorded from all the divisions with the exception of the Power division.

The revenue from the Leisure & Hospitality Division which was marginally lower, comprised revenue derived mainly from the Genting Highlands Resort and the GSPLC Group's UK casino operations. The revenue from the Genting Highlands Resort has increased due to the higher volume of business in spite of better luck factor in the previous year's corresponding quarter. This increase was however offset by the lower revenue from the UK casinos which operations were depressed due to poor luck factor and lower volume of business. This was further exacerbated by lower patronage to the casinos compared with the previous year's corresponding quarter.

Revenue from the Plantation Division declined mainly due to lower palm products prices and a decrease in FFB production.

The softer property market conditions during the current quarter caused a decline in the revenue from the Property Division.

The lower revenue from the Oil & Gas Division reflected mainly lower average oil prices.

The higher revenue from the Power Division arose mainly from the Kuala Langat power plant due to higher energy charges.

The Group's profit before tax for the current quarter was RM566.8 million, a decrease of 34% compared with the previous year's corresponding quarter's profit before tax of RM853.2 million.

The lower profit before tax of the Plantation Division and the Oil & Gas Division was mainly due to lower revenue.

The profit before tax from Genting Highlands Resort was higher, in line with the higher revenue. However, the profit before tax of the Leisure & Hospitality Division has been affected by the increase in pre-operating costs of SGD7.1 million incurred for the integrated resort in Singapore. The higher pre-operating costs related mainly to staff costs incurred as the integrated resort begins to accelerate its recruitment, training, sales and marketing programs prior to its launch.

The lower profit in the Power Division arose mainly from the higher operating costs incurred by the Meizhou Wan Plant, which was due primarily to the higher coal prices.

The lower profit before tax for the current quarter was also due to:

- impairment loss of RM30.4 million in the current quarter in respect of RWB Group's investment in SCL;
- no one-off gain in the current quarter compared with RM24.4 million net gain arising from dilution of the Company's shareholdings in RWB in the previous year's corresponding quarter; and
- lower share of profit from jointly controlled entities and associates in the current quarter.

2. Material Changes in Profit Before Taxation for the Current Quarter as compared with the immediate Preceding Quarter

The Group registered a profit before tax of RM566.8 million in the current quarter compared with a loss before tax of RM108.9 million in the preceding quarter. The loss in the preceding quarter was due to impairment losses of RM781.5 million which arose from RWB Group's investment in SCL.

The lower profit from the Leisure & Hospitality Division was due to the better luck factor from the premium player business in Genting Highlands Resort in the preceding quarter. The UK casinos also recorded lower profit due to the lower volume of business and poor luck factor.

The Plantation Division recorded a higher profit mainly due to an increase in the average CPO selling prices and lower operating expenses, partly offset by lower FFB production.

The Power Division had recorded a loss in the preceding quarter due mainly to the accrual of a one-off contribution in lieu of the annual windfall profit levy payable to the Malaysian Government by the Kuala Langat power plant. The Meizhou Wan Plant recorded a profit in the current quarter compared with a loss in the preceding quarter. This was due to higher generation of electricity and lower cost of coal supply in the current quarter.

3. **Prospects**

The performance of the Group for the remaining period of the current financial year may be impacted as follows:

- (a) the management of RWB Group expects the business environment to remain challenging due to the uncertainty surrounding the pace of global economic recovery and the spread of the Influenza A (H1N1) virus. This may affect consumers' sentiments and visitations to Genting Highlands Resort. The RWB Group management will continue to closely monitor its business and take appropriate measures to address any slowdown in its business activities;
- (b) the general UK economy is poor and the economic outlook is uncertain as shown by sharp declines in the main economic indicators. The economic slowdown has had a material impact on disposable income for some time and the GSPLC management expects the situation to continue. As a result, the trading revenue of the UK casino operations have been and will continue to be adversely affected. Against the current economic climate, the GSPLC management has implemented a series of cost cutting measures over the past 12 months resulting in a lower cost structure to mitigate the impact of the revenue reduction and will continue to remain vigilant on measures for improvement;
- (c) in preparation for the scheduled opening of the integrated resort in Singapore, the GSPLC Group will be incurring significant pre-opening costs as it accelerates its human resource recruitment, training and sales and marketing programs for the integrated resort. Staff and payroll related costs would comprise a significant portion of such pre-opening costs. Such pre-opening expenses are likely to be expensed in 2009 and therefore would have a significant impact to the overall profit and loss results of the GSPLC Group in 2009;
- (d) the performance of Meizhou Wan Plant could be affected by lower than expected tariff increases. Negotiations on the tariff rate are being carried out with the authorities. The Meizhou Wan Plant has taken measures to manage its fuel costs; and
- (e) the performance of Asiatic Development Berhad Group is expected to be reasonable, although the record profit achieved in the previous financial year is not expected to be matched given the prevailing palm product prices.

4. Variance of Actual Profit from Forecast Profit

The Group did not issue any profit forecast or profit guarantee for the year.

The fair value of the outstanding interest rate swap contracts of the Group which has not been recognised at the balance sheet date was an unfavourable net position of RM161.9 million.

These instruments are executed with creditworthy financial institutions and the Directors are of the view that the possibility of non-performance by these financial institutions is remote on the basis of their financial strength.

The Group uses derivative financial instruments including interest rate swap and currency swap agreements in order to limit the Group's exposure in relation to its underlying debt instruments resulting from adverse fluctuations in interest rates or foreign currency exchange rates and to diversify sources of funding. The related interest differentials under the swap agreements are recognised over the terms of the agreements in interest expense.
